Forecast for Sunday 01 Aug 2021

Weather: Clear spells during the early hours will give way to cloudier conditions as a weakening band of cloud and drizzle edges south across the park, reaching the Brecon Beacons around 0600. Showery outbreaks of drizzle persist throughout the morning with cloud breaking readily early afternoon. Long sunny spells develop during the afternoon allowing some late afternoon warmth. Clear spells continuing into the evening.

Chance of cloud free mountain/hill tops above 600m: 30% rising to 90% during the afternoon.

Visibility: Generally moderate with some poor visibilities early morning as outbreaks of showery rain and drizzle track south across the park. Areas of cloud during the morning with bases from 400-500m will also give poor visibilities near summits. During the afternoon any rain and drizzle should clear as cloud bases lift and break offering a marked improvement to visibilities.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

A damp and cloudy start to the day on Sunday and with low cloud leading to poor visibilities near summits, good navigation skills and wet weather gear will be required if heading out into the hills early in the day. Conditions improve during the early afternoon with some strong sunshine and thus high UV levels, sun protection is also recommend.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Fri 30 Jul 2021	25mm	25.6mm	38.8mm

Forecast for Monday 02 Aug 2021

Weather: Largely dry with clear or bright spells, risk of a few isolated showers, these mostly light or moderate. Any showers dying out later in the afternoon with long clear spells developing overnight.

Maximum wind: Light and variable 5-10mph.

Chance of cloud free mountain/hill tops above 600m: 50% rising to 70% during the afternoon.

Visibility: Generally good, however risk of some cloud banks near summits early in the morning but these lifting, developing showers may result in the sudden deterioration of visibilities at times.

Temperature: **Valleys:** Plus 12 Celsius, rising to plus 16 Celsius.
At 600m: Plus 09 Celsius, rising to plus 13 Celsius.
Freezing level: Above the summits.
